Catalog number RS-PROTA-LG

Protein A Agarose, large bead (spin / gravity)

Recombinant Protein A on highly cross-linked 4% agarose, 90 µm beads, binding >=25 mg human IgG per mL of resin. Sized for batch, spin-column, and gravity-flow antibody purification.

Specification

Ligand	recombinant Protein A (E. coli)
Matrix	4% agarose, highly cross-linked
Bead type	spherical
Bead size	90 µm (d50 volume-weighted)
Dynamic binding capacity	25 mg human IgG/mL resin (10% breakthrough, gravity flow, polyclonal hIgG)
Ligand leakage	<=15 ng/mg IgG (ELISA)
Max linear flow	500 cm/h
Max pressure	0.15 MPa
Binding buffer	20 mM sodium phosphate, 150 mM NaCl, pH 7.0
Elution buffer	0.1 M glycine-HCl pH 3.0
Storage buffer	20% ethanol
Clean-in-place	Clean with 6 M guanidine-HCl or 0.1 M acetic acid, then re-equilibrate in binding buffer. Native Protein A is alkali-labile: keep NaOH at or below 20 mM and expect capacity to fall and ligand leakage to rise with repeated caustic exposure.
Format	bulk resin

Ordering

Catalog no.	Pack	List price	Availability
RS-PROTA-LG-5ML	5 mL resin	$165	Waitlist
RS-PROTA-LG-25ML	25 mL resin	$550	Waitlist

Storage and shipping

Cold chain	Ambient. No cold chain required in transit.
Hazard classification	None
